PROPOSED PROJECT NAME:

Chain Stories 2010

SUMMARY / BRIEF DESCRIPTION ABOUT THE PROPOSED PROJECT

This project "Chain Stories" allows the participating students to write chain stories of 5 different categories like thriller, fairytale, fantasy and a Robinsonade in English + a German story as well. We have experienced that it was a great success to let the stories be interactive, so we will do that again. Each chapter will end with a choice if the person should "do something" or "don't". Then there will be two groups to continue the story. One group continues from if the person "does something" and a group continues from "don't". Both groups end their chapter with a choice as well and so forth. The students decide for themselves how long the story should be. An illustration should also be created along with the new chapter. The final product will be an interactive "book" where each student can decide how the story is. The stories will all be written in English - except for the German one. At the website there will be a chat & blog forum for the participating students.

RATIONALE FOR THE PROJECT:

The rationale is to have fun while writing a story and at the same time, the students will have the opportunity to learn about different genres as they explore the English language. They will also have the opportunity to contact the other participating students and take part in discussions at the website + upload pictures and create a profile about themselves.

EXPECTED CONTRIBUTION FROM ASIAN SCHOOLS/STUDENTS:

It is important to understand that the whole group depends on the students finishing the chapter and forward it via mail on time because otherwise the next participants will have lesser time. Also if students finally cannot participate, please pass the message so that somebody else can step in instead. It is also important that the teacher do not leave the responsibility to the students. It is the teachers' job to take on the responsibility that the story is written on time and the picture will be created. It is also important to answer e-mails you receive from the co-ordinator so that the necessary information is passed on for the project to continue.
